

CRIMECAST Reports

With a detailed, color-coded map and a spreadsheet of risk scores, users can identify potential asset protection concerns surrounding an address. A quick glance at the map shows the site in relation to its environment. The CRIMECAST Scores allow for an in-depth analysis of the overall crime risk.

CRIMECAST Scores

- A** The CAP Index Score represents the overall risk of crime at the address.
 - CRIMECAST Scores are based on a scale of 0 to 2000, with 0 representing the lowest risk and 2000 the highest – 100 is average.
 - A score of 600 is 6 times higher than average, and a score of 25 indicates that the risk is 1/4 the average.
 - Each CRIMECAST Report contains 90 risk scores provided for 3 geographic levels and 3 time periods:
 1. **National** scores provide the site's risk in comparison to the entire U.S.
 2. **State** scores compare the site to the average risk of the state in which it resides.
 3. **County** scores compare the site to the average risk of the county in which it resides.
 4. **Past, Current** and **Projected** risk scores are provided to allow for trending.

CRIMECAST Map

- B** Census tracts are outlined in blue. There are over 72,000 census tracts in the United States. Each tract contains several thousand residents with similar socioeconomic characteristics. Every census tract is assigned a numeric risk score and a coinciding risk shading.
- C** The site map is color-coded to depict the level of risk within each tract and identify the potential origin of criminal behavior. CAP Index Score ranges are used to assign risk shading similar to that of the green, yellow and red color scheme found on a traffic light.
- D** A radius threshold analysis is used to determine a site's overall risk. The inner radius represents 1 mile or a population of 25,000, equaling 2/3 of the overall score. The outer radius represents 3 miles or a population of 100,000, providing the remaining 1/3. In addition to the 1:3 methodology shown to the left, a 2:6 methodology is also available. This methodology applies an inner radius of 2 miles or a population of 100,000 and an outer radius of 6 miles or a population of 400,000.

CRIMECAST Scores

This page contains 90 risk scores provided for 3 geographic levels and 3 time periods.

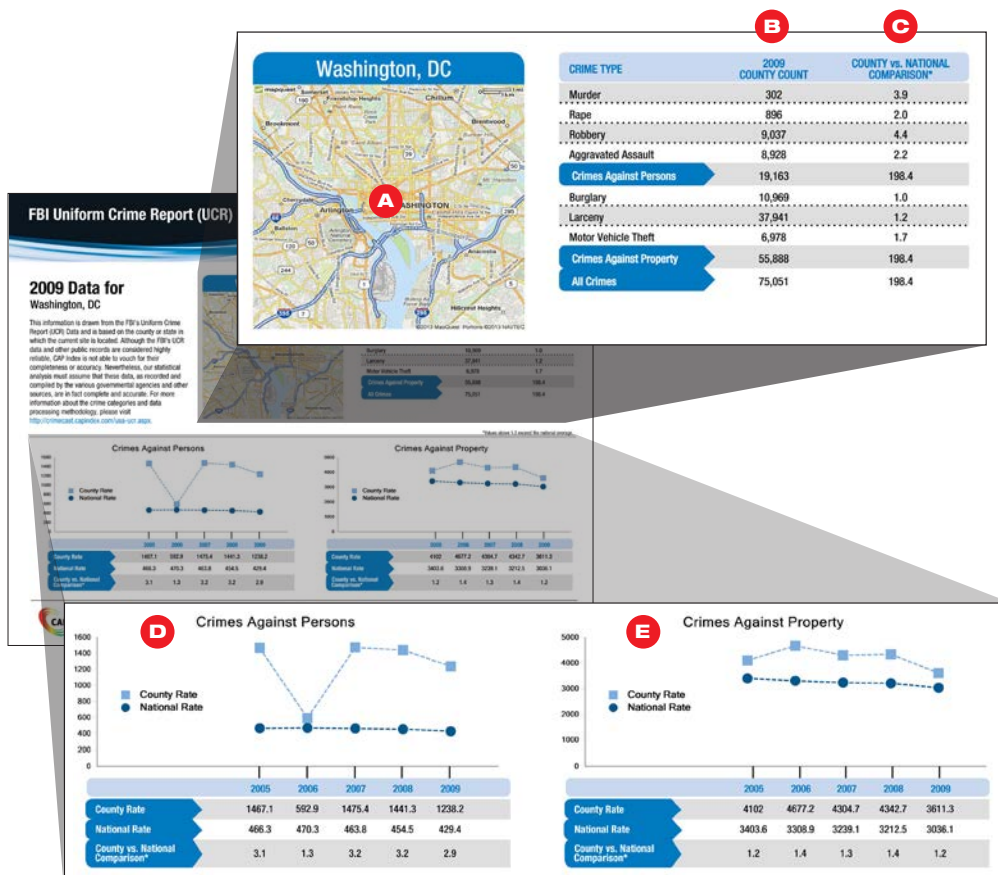

- A** **National** scores provide the site's risk in comparison to the entire U.S. and are broken down by CRIMECAST Category. **Past**, **Current** and **Projected** risk scores are provided to allow for trending.
- B** **State** scores compare the site to the average risk of the state in which it resides and are broken down by CRIMECAST Category. **Past**, **Current** and **Projected** risk scores are provided to allow for trending.
- C** **County** scores compare the site to the average risk of the county in which it resides and are broken down by CRIMECAST Category. **Past**, **Current** and **Projected** risk scores are provided to allow for trending.
- D** The **National Past**, **Current** and **Projected** risk scores for the CAP Index Score and each CRIMECAST Category are graphed in order to provide a visual representation of the site's risk pattern over an extended period of time.

About the FBI Uniform Crime Report (UCR) Data

CRIMECAST[®]

UCR Data

This information represents historical crime counts voluntarily provided to the FBI by most police departments in the United States and is based on the county or state in which the current site is located.

- A** The map shows the outline of the county or state in which the site is located. In the event that county data cannot be used, the assessment will be conducted at the state level.
- B** This column represents the number of crimes reported within the county or state in the given year. In addition to providing aggregated totals, the counts are broken down by crime type.
- C** This column displays a ratio of the county or state crime rate per 100,000 population in comparison to the national crime rate per 100,000 population. A rate ratio of 2.0 indicates that the county or state rate is twice the national average while a ratio of 0.5 means that it is 1/2 the national average. Ratios above 1.0 exceed the national average.
- D** The Crimes Against Persons graph provides a visual display of the county or state rates per 100,000 population as well as the national rates per 100,000 population for up to five years. Additionally, a ratio of the county or state rate per 100,000 population in comparison to the national rate per 100,000 population (County or State vs. National Comparison) is provided for up to five years.
- E** The Crimes Against Property graph provides a visual display of the county or state rates per 100,000 population as well as the national rates per 100,000 population for up to five years. Additionally, a ratio of the county or state rate per 100,000 population in comparison to the national rate per 100,000 population (County or State vs. National Comparison) is provided for up to five years.

Proximity Data

This page helps to identify potential targets, threats or other points of interest (POI) in a site's vicinity and is based on information supplied by external data providers. This assessment focuses on select POI categories that fall within the general headings of infrastructure, transportation and attractions.

Proximity Data

Points of Interest (POI) Within a 6-Mile Radius

POI CATEGORY CLOSEST POI NAME LOCATION DISTANCE IN MI

Attractions

- Marina: Washington Marina, Washington, DC 20024, 0.9
- Shopping: Shops Of Yesteryear, Mount Airy, MD 21771, 33.8
- Sports Complex: Verizon Center-7th St Box Office, Washington, DC 20001, 0.8

Infrastructure

- Court House: United States Court Of Appeals, Washington, DC 20005, 0.3
- Fire Station: National Council On Firework S, Washington, DC 20006, 0.3
- Hospital: George Washington Univ Hosp, Washington, DC 20037, 0.8
- Nuclear Plant: Calvert Cliffs, Lusby, MD 20657, 45.3
- Police Station: District Of Columbia Police Hdqtrs, Washington, DC 20001, 1.3
- Port: Alexandria, Alexandria, VA 22314, 5.8

Transportation

- Airport: Reagan National-B&c Departures, Washington, VA 20001, 2.9
- Bridge/Tunnel: Francis Case Mem Brg, Washington, DC 20024, 1.0
- Bus Station: Peter Pan-Washington Dc, Washington, DC 20002, 1.7
- Commuter Rail Station: Metro-Metro Center, Washington, DC 20005, 0.4
- Ferry Terminal: Whites Ferry Terminal, Dickerson, MD 20842, 31.5
- Highway Exit: 12th St/N, Washington, DC 20024, 1.1
- Park & Ride: Park & Ride, College Park, MD 20740, 9.5
- Train Station: Amtrak-Union Station, Washington, DC 20002, 1.6

B

- A** The map displays the closest point of interest from each POI category within a 6-mile radius of the site as listed in the table to the right. Points of interest that fall outside of the 6-mile radius are not displayed on the map.
- B** This table contains the name and location of the closest point of interest from each POI category. Additionally, the distance from the site to that point of interest is provided.
