

U.S. CRIME TRENDS & CORRELATION REPORT

Comparing year-over-year trends from 2019 to 2022

ABOUT THIS ANALYSIS

We conducted an in-depth analysis of over 1.7 million address-specific crimes from 2019 through 2022 to study trends from Q1 through Q3 over the last four years. In this analysis, we looked at police reports from a select number of U.S. cities that record premises type data. With this information, we are able to conduct in-depth analyses by premises type.

CRIMECAST[®] REPORTS TO IDENTIFY THE RISK OF CRIME AT ANY ADDRESS

Use CAP Scores to keep your customers and employees safer.

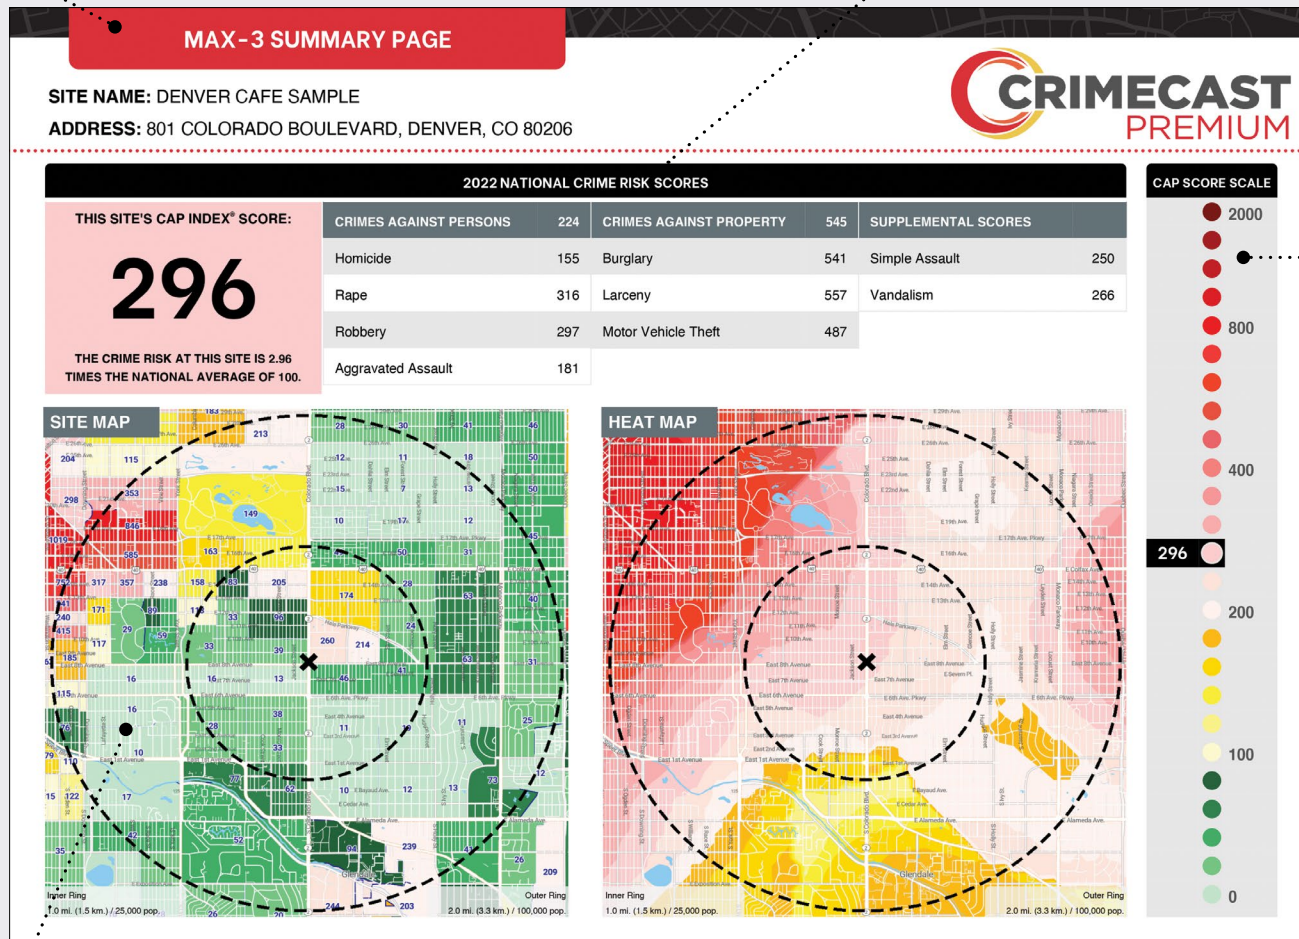

MULTIPLE SCORING METHODOLOGIES TO CHOOSE FROM

Four different “spheres of influence” to account for a perpetrator’s “journey to crime” and the nature and attractiveness of different types of targets.

CAP SCORES

Indicate the likelihood of crime and loss occurring at any address in the United States, Canada, and the UK.

CRIMECAST MAPS

Depict the risk of crime within a defined radius around each location. **Site Maps** show the Block Group Score for each “neighborhood” surrounding a given location and help depict the potential origin of criminal activity occurring at the location. **Heat Maps** provide an alternative view of the risk of crime within the map window by calculating the CAP Index for every point on the map and then shading its corresponding risk level.

KEY BENEFITS

- Proactively identify crime risks and deploy security resources where they are needed most.
- Leverage comprehensive, accurate, and objective data for your security decision-making processes.
- Benchmark locations and delivery routes to optimize security budgets based on hard data.
- Determine the right security plan for each new location.
- Mitigate crime risks and protect your brand reputation.
