

2020 FEE SCHEDULE

Multi-Year Discounts Are Available

VISUALIZE YOUR RISK AT EVERY SITE AND GEOGRAPHIC REGION

CRIMECAST Reports and Maps include all the relevant crime risk data for your locations and are readily available as soon as you need them. Each report includes maps and scores which indicate the risk of crime at and around a specific site-address.

CRIMECAST Reports come in two types (Basic and Premium) with four different scoring methodologies that can be applied to account for the ways that perpetrators of crime may travel to different types of business locations.

CRIMECAST Citywide Maps are 4' x 3' color maps detailing the risk of crime for larger geographic areas. Each map covers an area of up to approximately 46 x 30 miles.
