## CRIMECAST Reports

With a detailed, color-coded map and a spreadsheet of risk scores, users can identify potential asset protection concerns surrounding an address. A quick glance at the map shows the site in relation to its environment. The CRIMECAST Scores allow for an in-depth analysis of the overall crime risk.

3-Mile Methodology: Site Map
XYZ Corporation

A This Site's 2019 National CAP Index Score:

765

The White House
1600 Pennsylvania Avenue
Washington, DC 20500

Latitude: 38.89768
Longitude: -77.03657

CRIMECAST Scores are based on a scale of 0 to 2000, with 0 representing the lowest risk and 2000 the highest – 100 is average. A score of 765 is 7.65 times higher than average.

Within this map, individual block groups are color-coded to depict the level of risk within the tract and identify the potential origin of crime or criminal behavior.

CRIMECAST Site Map

CRIMECAST CATEGORY	SCORE
CAP Index	765
Homicide	319
Rape	776
Robbery	783
Aggravated Assault	460
Crimes Against Persons	569
Burglary	295
Larceny	734
Motor Vehicle Theft	416
Crimes Against Property	665

Projected - 2024	834

CRIMECAST Scores

A The CAP Index Score represents the overall risk of crime at the address.

- CRIMECAST Scores are based on a scale of 0 to 2000, with 0 representing the lowest risk and 2000 the highest – 100 is average.
- A score of 600 is 6 times higher than average, and a score of 25 indicates that the risk is 1/4 the average.

CRIMECAST Maps

B There are over 215,000 block groups in the United States. Each one typically contains thousands of residents with similar socioeconomic characteristics. Every block group is assigned a numeric risk score and a coinciding risk shading.

C The Site Map is color-coded to depict the level of risk within each block group and identify the potential origin of criminal behavior. CAP Index Score ranges are used to assign risk shading similar to that of the green, yellow, and red color scheme found on a traffic light.

D A radius threshold analysis is used to determine a site's overall risk. The inner radius represents 1 mile or a population of 25,000, equaling 80% of the overall score. The outer radius represents 3 miles or a population of 100,000, providing the remaining 20%. In addition to the 3-mile methodology shown to the left, a 6-mile methodology is also available. This methodology applies an inner radius of 2 miles or a population of 100,000 and an outer radius of 6 miles or a population of 400,000.

C Score Ranges:

0-99	100-199	200-399	400-799	800-2000

CRIMECAST Scores

This page contains 90 risk scores provided for 3 geographic levels and 3 time periods.

A **National** scores provide the site's risk in comparison to the entire US and are broken down by CRIMECAST Category. **Past, Current** and **Projected** risk scores are provided to allow for trending.

B **State** scores compare the site to the average risk of the state in which it resides and are broken down by CRIMECAST Category. **Past, Current,** and **Projected** risk scores are provided to allow for trending.

C **County** scores compare the site to the average risk of the county in which it resides and are broken down by CRIMECAST Category. **Past, Current,** and **Projected** risk scores are provided to allow for trending.

D The **National Past, Current,** and **Projected** risk scores for the CAP Index Score and each CRIMECAST Category are graphed in order to provide a visual representation of the site's risk pattern over an extended period of time.
